 - Six-Piece Keepsake
 - Stakes included:
 - (4) 10x30 H-Stakes
 - (4) (6x8) stakes used to install the front row of the sign. The smaller stakes are mailed separately.
-

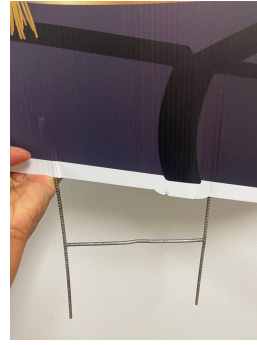

General Instructions

Installing the bottom row pieces (2 bookends and name sign)

1. Begin by unpacking your box and organizing all of your items in a visible location.
2. You will receive four small 6x8 stakes in a separate shipment that are to be used to install the front images.
3. First, place one small (6x8) stake in each of the bookend.
4. Next, place two small (6x8) stakes in the personalized name sign (one on each side to balance). Tip: when putting the stakes into the front row items, leave enough room to put your hands through the stake to help push into the ground. Then once in the ground, push the sign all the way down on the stake.
5. Once you're ready, place the name sign in the ground.
6. Next place one bookends on each side of the name sign (all three pieces should touch to brace each other).

Installing the top row (balloons and picture sign):

1. Starting about 1-2 feet behind the front row,
2. Insert two tall 10x30 stakes into the photo piece (far enough that it is secure but not all the way down).
3. Next place one 10x30 Stake into each of the balloons. (It is not necessary to push them all the way down on the stake).

Leave room to place your hands through. Do this for all pieces on the front row. This will help you grip the sign when installing into the ground.

4. Align the photo over the name sign and press it into firmly into the ground. Finally, place balloons on each side of the picture to complete the installation.

To add an extra layer of support, you can apply gorilla, 3M or white duct tape to your sign. Using the tape you can tape the balloons on each side to the photo piece and then tape the book ends to the name sign for additional reinforcement. (see below how the top row balloons should brace the photo and the bookends should brace the name sign.)
